## Opis produktu

**Świece zapłonowe HKS Super Fire M-Series**

Świece zapłonowe z serii M są wysokowydajnymi świecami irydowymi zaprojektowanymi, aby zapewnić lepszą wydajność zapłonu, trwałość i odporność.

- 0.6mm irydowa elektroda środkowa
- Zewnętrzna elektroda z chipem Platinum
- Krótka elektroda zewnętrzna (antywibracyjna)
- Bariera termiczna

**Seria M jest zalecana dla niezawodnego zapłonu, trwałości i ograniczenia gromadzenia się nagaru pod dużym obciążeniem.**

Stop Iridium jest stosowany ze względu na jego trwałość i niezawodność. Na przeciętnej świecy wąski rdzeń zazwyczaj skraca żywotność, ale przy intensywnej trwałości irydu zapewnia długowieczność. Przy wysokiej temperaturze topnienia wynoszącej 2454 stopni Celsjusza, w przeciwieństwie do białego złota o temperaturze 1769 stopni C, elektroda może tolerować wysoki poziom kompresji. Niklowa powłoka na obudowie zapobiega również przedwczesnemu zniszczeniu świecy zapłonowej.

**Poziom ciepła:** NGK # 8
**Wielkość gwintu:** 14mm × 26.5mm
**Wielkość nakrętki:** 16mm

**Lista aplikacyjna:**
