Opis produktu

Wired remote start/stop USB logging switch for VBOX Video HD2.

This logging switch allows the user to log to a USB stick or solid state hard drive (formatted to FAT32) and also gives full control over when the HD2 starts and stops logging.

Please note, if you would like to log to a USB device, you will need to adjust the HD2 scene configuration using the supplied setup software:

- 'Log To' option needs changing to 'USB Drive'.
