Opis produktu

With its quick-release catches, the mounting bracket allows for the VBOX Video HD2 to be secured in the car but also quickly removed.

The customer will need to supply a metal or plastic sheet with four M4 bolts or rivets fitted in alignment with the clamp's quick-release catches or the bolts/rivets can be inserted directly into the vehicle chassis. The clamp then secures the HD2 onto the sheet or chassis but removal is quick and easy by simply moving the catches back.

The mounting clamp has pads on its inner faces to stop the HD2 being scratched.
